

ARMIS

EXCELLENCE THAT PROTECTS

CATALOGUE  
• MMXXVI •

### **Inspired by History, Created for the Future**

The name ARMIS originates from the Latin word “arma,” evoking strength and protection. The brand draws inspiration from the medieval shields used by the knights of D. Afonso Henriques—symbols of defense and conquest—reinterpreting them through a modern, minimalist aesthetic. It is also inspired by the concept of the Fifth Empire, envisioned by Fernando Pessoa.

### **Commitment to Excellence**

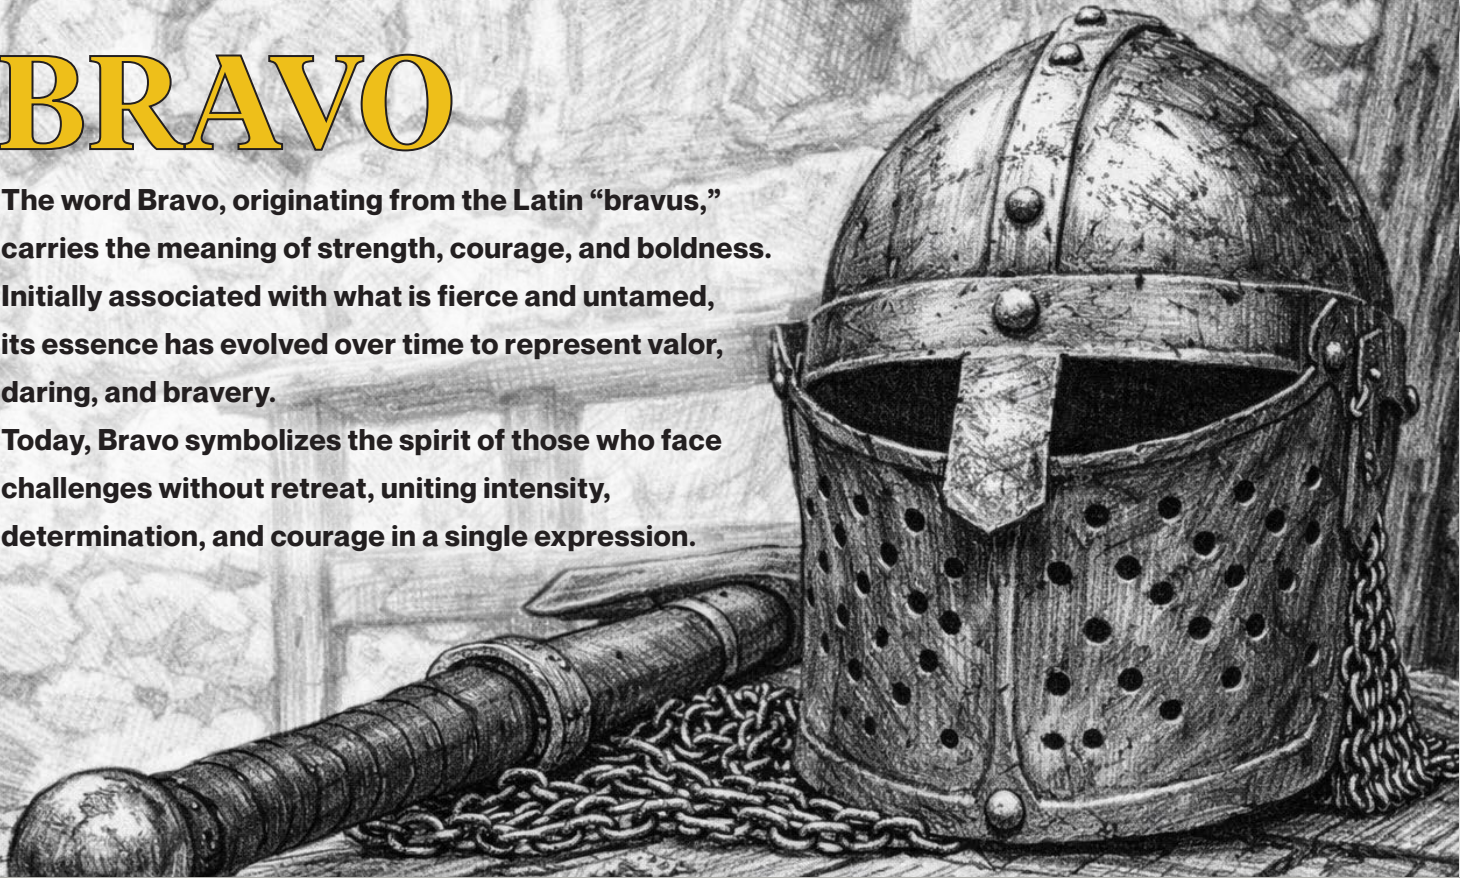

ARMIS is not merely a brand, it is a standard of excellence. Each helmet is crafted using only the finest materials, refined aerodynamics, and meticulous ergonomics, ensuring we remain close to the highest safety standards without compromising comfort, performance, or sound insulation. The fusion of advanced technology and precision craftsmanship results in products that not only protect, but elevate the riding experience.

# BRAVO

The word **Bravo**, originating from the Latin “**bravus**,” carries the meaning of **strength, courage, and boldness**. Initially associated with what is **fierce and untamed**, its essence has evolved over time to represent **valor, daring, and bravery**.

Today, **Bravo** symbolizes the spirit of those who face challenges without retreat, uniting **intensity, determination, and courage** in a single expression.

# BRAVO ESSENTIA

FORGED CARBON - XS | S | M | L | XL

Developed with forged carbon, one of the most advanced materials in modern engineering, it combines extreme strength, unmatched lightness, and a sophisticated finish that immediately sets it apart from others.

This technology, used in high-performance applications, results in a helmet that is stronger, safer, and significantly lighter, reducing fatigue and enhancing comfort on long journeys.

The forged carbon structure offers superior impact absorption, ensuring maximum protection even in the most demanding situations.

Its unique pattern makes each piece visually distinctive, reflecting personality, strength, and authenticity. It is not just a helmet, it is a statement of style, exclusivity, and commitment to safety.

# ODYSSEUS

**He provokes the wrath of his enemies and the gods, especially Poseidon.**

**He is cunning, provocative, and strategic, often outmatching his adversaries.**

**His actions generate conflict, but they also ensure his survival.**

# ODYSSEUS ESSENTIA

FORGED CARBON - XS | S | M | L | XL

The ODYSSEUS model represents a new benchmark in protection and performance. Manufactured in forged carbon or complex composite fibers, it combines extreme structural strength with reduced weight, resulting in enhanced safety and comfort even on long journeys.

Its advanced construction ensures excellent impact absorption, while the finish and precision of its details reflect a level of quality far above the segment average.

Developed for demanding riders, it is the ideal choice for those seeking durability, cutting-edge technology, and a high level of protection both on the road and on more challenging terrain.

# ADAMASTOR

SPECIAL EDITION – LIMITED TO 100 UNITS

The limited edition ADAMASTOR represents the ultimate expression of the ARMIS identity: strength, destiny, and courage in the face of the unknown.

Inspired by the mythical Adamastor, the legendary figure symbolizing the clash between humankind and the untamable forces of the world, this helmet is born as a tribute to the spirit of the discoverers, men who faced the impossible to redraw the boundaries of the world.

The exclusive design of this limited edition conveys, through striking lines and a carefully crafted chromatic composition, the tension between power, mystery, and determination. Every detail was conceived to project visual authority and absolute presence, turning each unit into an object of almost ceremonial character.

Produced in only 100 numbered units, the ARMIS ADAMASTOR is more than a helmet: it is a symbol of personal conquest, destined for those who refuse to accept imposed boundaries, on the road or beyond it.

ADAMASTOR does not only protect the head.

It protects the decision to go further.
